

This image shows a full page of graph paper with a central vertical margin and two columns of lined writing space on either side. The grid consists of small squares, and the central margin is wider than the outer columns. The paper is otherwise blank, with no text or markings.

The image shows a large grid of graph paper. A central column of data points is plotted, showing a series of peaks and troughs. The data points are represented by small black squares. The grid consists of approximately 100 columns and 100 rows. The central column is roughly in the middle of the grid. The data points are arranged in a pattern that resembles a sine wave or a similar periodic function, with some irregularities. The points are scattered across the grid, with some clusters and some gaps.
